

GLASS PROTECTIVE SHIELD

Aluminum Construction

This shield is manufactured from high quality 6061 aluminum. Locally sourced, perfectly machined to ensure a fit and finish second to none.

Tempered Glass

One feature this shield boasts is a 6mm edged and tempered glass screen. Unlike plexiglass, tempered glass will stand up to repeated cleaning and will not yellow from UV exposure. As an added bonus, alcohol based disinfectants can be used without degradation to the screen, maintaining its integrity for years to come.

Welded and Powder coated

Due to the conditions this shield must endure, all posts are machined, welded and powder coated for maximum strength and durability.

ALBERTA MADE

It all started when we were struck with the news of a global pandemic. In the weeks to follow, we noticed makeshift emergency shields going up in businesses to protect their staff. Quickly erected and poorly constructed, these screens were made as a quick solution only. We now know that this pandemic is here to stay, so why not make a shield that will too?

Locally sourced and hand crafted in Calgary, our aim is to provide businesses with a versatile solution to keep employees safe from communicable diseases. This product is designed to maintain aesthetics in a professional setting without sacrificing quality or protection.

Specifications

Standard size options:

36" x 36"

48" x 36"

Panels are easily linked for extended angled or linear coverage.

Custom available upon request.

Mounting options:

-Screw down baseplate

-Anchor-less adhesion

Standard colour options:

-Matte Black

-Light Grey

Custom available upon request.

Approximate Shipping Weight.

36" 15.21kg

48" 19.67kg

Hardware included.

Comprehensive installation video available via link on our website.
